

HOME TRENDS 2024

DESIGN TRENDS TO KNOW IN 2024 AND WHAT'S ON ITS WAY OUT

◆ QUIET LUXURY

Tonal decorating is your secret weapon to a calming, fashion-forward space. Tonal involves using a different shade of the same color within the space creating a subtle, sophisticated look with varying levels of contrast. Tonal designs often include a mix of light, medium, and dark shades of the chosen color to add visual interest while maintaining a cohesive overall aesthetic.

◆ BRASS ACCENTS AND VINTAGE LIGHTING

Vintage lighting incorporates designs, material and finishes reminiscent of past eras, such as Art Deco, Mid-Century Modern and Industrial. The right piece can really bring a room together to make it feel collected.

◆ SOFT GREENS

Dark and light shades of green were emerging color trends in 2024 and a top accent color for many. Soft green works well in homes that want to have an elegant cool, calm, and collected appearance.
